Thanking you for attention I remain Very/truly yours	-7	Executive Regi	stry
Dear Mr. Please have the office of security clear the following. To the Editors Life, Time & Life Building Rockefeller Center New York 20, N.Y. Sirs: The picture of the hand held submachine gun the instructor is firing on page 28 Life, April 14 issue, is the U.S. caliber .45 M3 submachine gun. This weapon may readily be converted from caliber .45 to 9MM by substituting a 9MM bolt, barrel, magazine adaptor and 9MM magazine. The M3 is often mistaken for the improved M3Al and vice versa. In this picture the identifying point is the short bolt cover assembly with a continuous lip. Notice that the instructor is firing the weapon left handed.	•~~	6/-33	67
